

CLAIMS

1. A photocatalyst-containing silicone resin composition comprising TiO_2 , a Zr containing compound, a hydrolyzable silicone resin and a Si containing compound containing SiO_2 particles, wherein a content of said Zr containing compound in terms of an oxide thereof is 0.005 to 0.1 parts by weight with respect to 1 part by weight of TiO_2 , a content of said Si containing compound in terms of an oxide thereof is 0.5 to 6.0 parts by weight with respect to 1 part by weight of TiO_2 , and a content of said SiO_2 particles is 0.1 to 3 parts by weight with respect to 1 part by weight in terms of an oxide of said hydrolyzable silicone resin.
2. The composition as set forth in claim 1, wherein the content of said Zr containing compound is 0.005 to 0.02 parts by weight.
3. The composition as set forth in claim 1, wherein said SiO_2 particles comprise a colloidal silica having an average particle size of 60 nm or less.
4. A cured film obtained by heat curing the composition as set forth in claim 1.
5. A coated article having a cured film obtained by heat curing the composition as set forth in claim 1.
